

King's Gambit

A ground-up visual course for practical play

Core route position - gold marks the last move

WHITE FOCUS

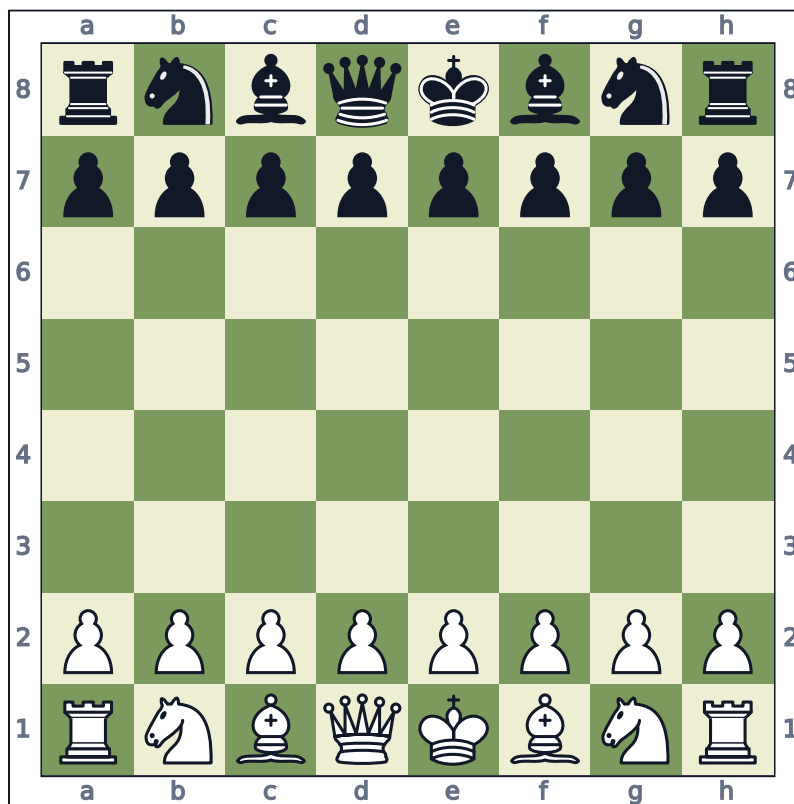

OPENING IDENTITY

White offers a pawn to pull Black's e-pawn away and accelerate an attack.

ORIENTATION

Ground zero: read the board and the moves

White starts from ranks 1-2; Black starts from ranks 7-8. Files run a through h. Each lesson highlights the last move in gold so your eyes connect notation to the board.

Starting position - White to move

HOW ALGEBRAIC NOTATION WORKS

Nf3 means a knight moves to f3. B means bishop, R rook, Q queen, K king; pawns use only the destination square. An x means capture, + means check, and O-O means kingside castling.

YOUR FIRST ANCHOR

Say the first moves aloud, then point to every destination square:

1. e4 e5 2. f4 exf4 3. Nf3 g5

Course promise: The pawn is an investment in time, not a debt.

MOVES 1-3

Lesson 1: the first conversation

1. e4 e5 2. f4 exf4 3. Nf3 g5

After 3. Nf3 g5

- 1. e4 - Claims or challenges central space and opens a line for a piece.
- 1... e5 - Claims or challenges central space and opens a line for a piece.
- 2. f4 - Creates a lever against the center or supports a coming break.
- 2... exf4 - Resolves central tension and changes the pawn structure.
- 3. Nf3 - Develops a knight toward the center and increases control of key central squares.
- 3... g5 - Gains wing space, but also changes squares that can no longer be protected by this pawn.

DEVELOPMENT

Lesson 2: build the core position

1. e4 e5 2. f4 exf4 3. Nf3 g5 4. h4 g4 5. Ne5 Nf6

White to move

WHAT THE PIECES ARE BUILDING

White offers a pawn to pull Black's e-pawn away and accelerate an attack.

BEGINNER CHECKPOINT

Before copying the next move, ask: Is my king safe? Which piece is still at home? What changed in the center? Which pawn break is each side preparing?

CORE LINE

Lesson 3: complete the main route

1. e4 e5 2. f4 exf4 3. Nf3 g5 4. h4 g4 5. Ne5 Nf6 6. Bc4 d5 7. exd5 Bd6 8. d4 Nh5

Core position - now plans matter more than memorized moves

DO NOT MEMORIZE BLINDLY

The route is a model, not a forced script. Its job is to teach this relationship: White offers a pawn to pull Black's e-pawn away and accelerate an attack. If the opponent deviates, preserve the same priorities until a concrete tactic changes them.

UNDERSTANDING

The position map: plans for both sides

Read plans from the pawn structure, not from the opening name

WHITE'S PLAN

Develop with tempo, recover control of the center, and open files toward the black king.

BLACK'S PLAN

Keep the extra pawn only when safe, counter in the center, and return material to finish development.

THE LEVER TO REMEMBER

White's d4 restores central control; Black's ...d5 challenges the attacking setup.

CALCULATION

Tactical literacy: what can suddenly change

Pause here - White to move

THEME

Checks on h5 and sacrifices on f7 appear when Black's king and kingside pawns are stretched.

COMMON BEGINNER ERROR

Trying to win the f4-pawn back immediately instead of completing development.

THREE-SECOND SAFETY SCAN

1. Checks against both kings. 2. Captures in the center. 3. Threats against loose or pinned pieces.

ADAPTATION

Decision tree: when the opponent leaves the route

A branch point - principles are your map

1. If the center stays fluid

Finish development and keep the opening identity in view: White offers a pawn to pull Black's e-pawn away and accelerate an attack.

2. If the center closes

Use the pawn-chain direction. Attack the base before making wing moves that cannot be supported.

3. If the center opens

Prioritize king safety, active pieces, and checks or captures before slow pawn moves.

4. If nothing is forced

Return to the planned lever: White's d4 restores central control; Black's ...d5 challenges the attacking setup.

MEMORY SENTENCE

The pawn is an investment in time, not a debt.

ACTIVE RECALL

Recall test: answer before you turn the page

POSITION A

White to move

POSITION B

White to move

- A1. What is the next route move for White?
- A2. What opening problem does that move solve?
- B1. What is the next route move for White?
- B2. Name one plan for White and one plan for Black.
- C. State the thematic pawn break without looking back.

SCORING

5/5: replay from memory. 3-4/5: review Lessons 3 and 6. 0-2/5: return to Lesson 1 and rebuild the route slowly.

RETENTION

Answer key and a 14-day practice loop

POSITION A

Next route move: Nf3. Explain it using development, center, king safety, or a direct tactical need.

POSITION B

Next route move: Ne5. Then compare the position with the final core board.

PLAN AND BREAK ANSWERS

White: Develop with tempo, recover control of the center, and open files toward the black king. Black: Keep the extra pawn only when safe, counter in the center, and return material to finish development. Lever: White's d4 restores central control; Black's ...d5 challenges the attacking setup.

14-DAY LOOP

- Days 1-2: replay the first three moves from both sides and name each move's job.
- Days 3-4: build the core position from memory; correct the first error, then restart.
- Days 5-6: say White's plan, Black's plan, and the pawn break without a board.
- Day 7: take the recall test. Record the score; do not count lucky guesses.
- Days 8-10: play three slow practice games, starting from the core position if possible.
- Days 11-13: review only mistakes and deviations that actually occurred in your games.
- Day 14: retake the test and write a one-sentence opening rule in your own words.
