

Sicilian Alapin

A ground-up visual course for practical play

Core route position - gold marks the last move

WHITE FOCUS

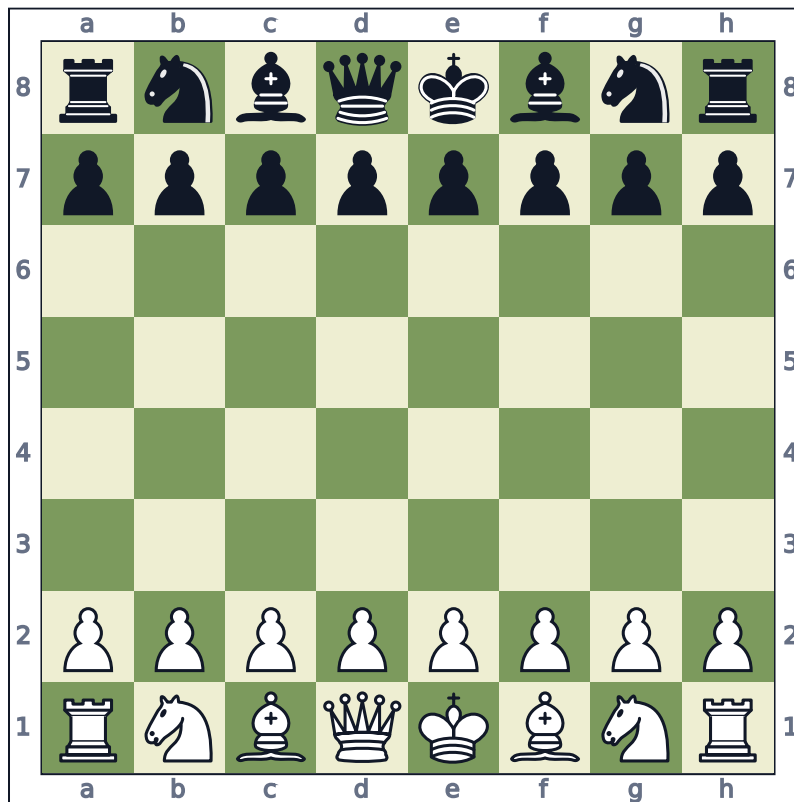

OPENING IDENTITY

White prepares d4 with a pawn, aiming for a broad classical center.

ORIENTATION

Ground zero: read the board and the moves

White starts from ranks 1-2; Black starts from ranks 7-8. Files run a through h. Each lesson highlights the last move in gold so your eyes connect notation to the board.

Starting position - White to move

HOW ALGEBRAIC NOTATION WORKS

Nf3 means a knight moves to f3. B means bishop, R rook, Q queen, K king; pawns use only the destination square. An x means capture, + means check, and O-O means kingside castling.

YOUR FIRST ANCHOR

Say the first moves aloud, then point to every destination square:

1. e4 c5 2. c3 Nf6 3. e5 Nd5

Course promise: Build d4, then defend the center with pieces.

MOVES 1-3

Lesson 1: the first conversation

1. e4 c5 2. c3 Nf6 3. e5 Nd5

After 3. e5 Nd5

- 1. e4 - Claims or challenges central space and opens a line for a piece.
- 1... c5 - Creates a lever against the center or supports a coming break.
- 2. c3 - Creates a lever against the center or supports a coming break.
- 2... Nf6 - Develops a knight toward the center and increases control of key central squares.
- 3. e5 - Claims or challenges central space and opens a line for a piece.
- 3... Nd5 - Repositions the knight toward a useful outpost or away from a pawn attack.

DEVELOPMENT

Lesson 2: build the core position

1. e4 c5 2. c3 Nf6 3. e5 Nd5 4. d4 cxd4 5. Nf3 Nc6

White to move

WHAT THE PIECES ARE BUILDING

White prepares d4 with a pawn, aiming for a broad classical center.

BEGINNER CHECKPOINT

Before copying the next move, ask: Is my king safe? Which piece is still at home? What changed in the center? Which pawn break is each side preparing?

CORE LINE

Lesson 3: complete the main route

1. e4 c5 2. c3 Nf6 3. e5 Nd5 4. d4 cxd4 5. Nf3 Nc6 6. cxd4 d6 7. Bc4 dxe5 8. dxe5

Core position - now plans matter more than memorized moves

DO NOT MEMORIZE BLINDLY

The route is a model, not a forced script. Its job is to teach this relationship: White prepares d4 with a pawn, aiming for a broad classical center. If the opponent deviates, preserve the same priorities until a concrete tactic changes them.

UNDERSTANDING

The position map: plans for both sides

Read plans from the pawn structure, not from the opening name

WHITE'S PLAN

Build the center, develop behind it, and use space without overprotecting every pawn.

BLACK'S PLAN

Attack e4 immediately, exchange central pawns, and make White prove the center is stable.

THE LEVER TO REMEMBER

Black's ...d5 or ...d6 attacks the center; White may advance e5 for space.

CALCULATION

Tactical literacy: what can suddenly change

Pause here - Black to move

THEME

The advanced e5-pawn can gain time on a knight but can also become a target.

COMMON BEGINNER ERROR

Recapturing automatically without checking whether isolated pawns and piece activity favor Black.

THREE-SECOND SAFETY SCAN

1. Checks against both kings. 2. Captures in the center. 3. Threats against loose or pinned pieces.

ADAPTATION

Decision tree: when the opponent leaves the route

A branch point - principles are your map

1. If the center stays fluid

Finish development and keep the opening identity in view: White prepares d4 with a pawn, aiming for a broad classical center.

2. If the center closes

Use the pawn-chain direction. Attack the base before making wing moves that cannot be supported.

3. If the center opens

Prioritize king safety, active pieces, and checks or captures before slow pawn moves.

4. If nothing is forced

Return to the planned lever: Black's ...d5 or ...d6 attacks the center; White may advance e5 for space.

MEMORY SENTENCE

Build d4, then defend the center with pieces.

ACTIVE RECALL

Recall test: answer before you turn the page

POSITION A

White to move

POSITION B

White to move

- A1. What is the next route move for White?
- A2. What opening problem does that move solve?
- B1. What is the next route move for White?
- B2. Name one plan for White and one plan for Black.
- C. State the thematic pawn break without looking back.

SCORING

5/5: replay from memory. 3-4/5: review Lessons 3 and 6. 0-2/5: return to Lesson 1 and rebuild the route slowly.

RETENTION

Answer key and a 14-day practice loop

POSITION A

Next route move: e5. Explain it using development, center, king safety, or a direct tactical need.

POSITION B

Next route move: Nf3. Then compare the position with the final core board.

PLAN AND BREAK ANSWERS

White: Build the center, develop behind it, and use space without overprotecting every pawn. Black: Attack e4 immediately, exchange central pawns, and make White prove the center is stable. Lever: Black's ...d5 or ...d6 attacks the center; White may advance e5 for space.

14-DAY LOOP

- Days 1-2: replay the first three moves from both sides and name each move's job.
- Days 3-4: build the core position from memory; correct the first error, then restart.
- Days 5-6: say White's plan, Black's plan, and the pawn break without a board.
- Day 7: take the recall test. Record the score; do not count lucky guesses.
- Days 8-10: play three slow practice games, starting from the core position if possible.
- Days 11-13: review only mistakes and deviations that actually occurred in your games.
- Day 14: retake the test and write a one-sentence opening rule in your own words.
