

King's Indian Defense

A ground-up visual course for practical play

Core route position - gold marks the last move

BOTH SIDES

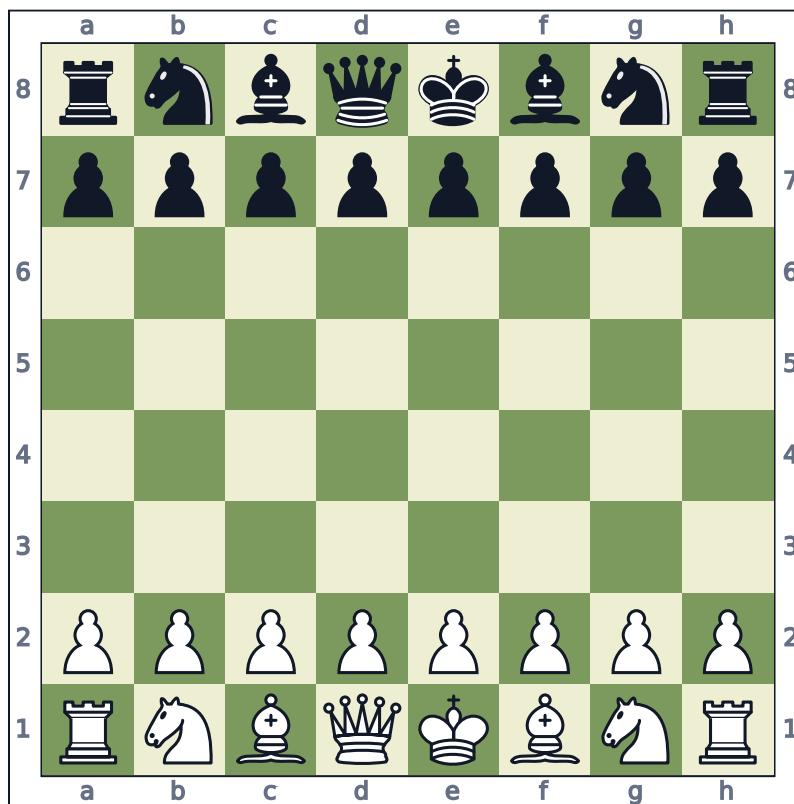

OPENING IDENTITY

A closed center often produces White's queenside space against Black's kingside attack.

ORIENTATION

Ground zero: read the board and the moves

White starts from ranks 1-2; Black starts from ranks 7-8. Files run a through h. Each lesson highlights the last move in gold so your eyes connect notation to the board.

Starting position - White to move

HOW ALGEBRAIC NOTATION WORKS

Nf3 means a knight moves to f3. B means bishop, R rook, Q queen, K king; pawns use only the destination square. An x means capture, + means check, and O-O means kingside castling.

YOUR FIRST ANCHOR

Say the first moves aloud, then point to every destination square:

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7

Course promise: Follow the pawn-chain arrows: White queenside, Black kingside.

MOVES 1-3

Lesson 1: the first conversation

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7

After 3. Nc3 Bg7

- 1. d4 - Claims or challenges central space and opens a line for a piece.
- 1... Nf6 - Develops a knight toward the center and increases control of key central squares.
- 2. c4 - Creates a lever against the center or supports a coming break.
- 2... g6 - Gains wing space, but also changes squares that can no longer be protected by this pawn.
- 3. Nc3 - Develops a knight toward the center and increases control of key central squares.
- 3... Bg7 - Develops on an active diagonal, often adding a pin or long-range pressure.

DEVELOPMENT

Lesson 2: build the core position

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O

White to move

WHAT THE PIECES ARE BUILDING

A closed center often produces White's queenside space against Black's kingside attack.

BEGINNER CHECKPOINT

Before copying the next move, ask: Is my king safe? Which piece is still at home? What changed in the center? Which pawn break is each side preparing?

CORE LINE

Lesson 3: complete the main route

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. Nf3 O-O 6. Be2 e5 7. O-O Nc6 8. d5 Ne7

Core position - now plans matter more than memorized moves

DO NOT MEMORIZE BLINDLY

The route is a model, not a forced script. Its job is to teach this relationship: A closed center often produces White's queenside space against Black's kingside attack. If the opponent deviates, preserve the same priorities until a concrete tactic changes them.

UNDERSTANDING

The position map: plans for both sides

Read plans from the pawn structure, not from the opening name

WHITE'S PLAN

Use queenside space, prepare c5, and slow Black's attack without losing the initiative.

BLACK'S PLAN

Close with ...e5, maneuver, and break with ...f5 toward White's king.

THE LEVER TO REMEMBER

White's c5 and Black's ...f5 define the two-wing race.

CALCULATION

Tactical literacy: what can suddenly change

Pause here - White to move

THEME

Knight maneuvers to g6 or h5 support ...f5; White often uses b4 and c5 to open files.

COMMON BEGINNER ERROR

Attacking on the wrong wing just because the pieces are nearby.

THREE-SECOND SAFETY SCAN

1. Checks against both kings. 2. Captures in the center. 3. Threats against loose or pinned pieces.

ADAPTATION

Decision tree: when the opponent leaves the route

A branch point - principles are your map

1. If the center stays fluid

Finish development and keep the opening identity in view: A closed center often produces White's queenside space against Black's kingside attack.

2. If the center closes

Use the pawn-chain direction. Attack the base before making wing moves that cannot be supported.

3. If the center opens

Prioritize king safety, active pieces, and checks or captures before slow pawn moves.

4. If nothing is forced

Return to the planned lever: White's c5 and Black's ...f5 define the two-wing race.

MEMORY SENTENCE

Follow the pawn-chain arrows: White queenside, Black kingside.

ACTIVE RECALL

Recall test: answer before you turn the page

POSITION A

White to move

POSITION B

White to move

- A1. What is the next route move for White?
- A2. What opening problem does that move solve?
- B1. What is the next route move for White?
- B2. Name one plan for White and one plan for Black.
- C. State the thematic pawn break without looking back.

SCORING

5/5: replay from memory. 3-4/5: review Lessons 3 and 6. 0-2/5: return to Lesson 1 and rebuild the route slowly.

RETENTION

Answer key and a 14-day practice loop

POSITION A

Next route move: Nc3. Explain it using development, center, king safety, or a direct tactical need.

POSITION B

Next route move: Nf3. Then compare the position with the final core board.

PLAN AND BREAK ANSWERS

White: Use queenside space, prepare c5, and slow Black's attack without losing the initiative. Black: Close with ...e5, maneuver, and break with ...f5 toward White's king. Lever: White's c5 and Black's ...f5 define the two-wing race.

14-DAY LOOP

- Days 1-2: replay the first three moves from both sides and name each move's job.
- Days 3-4: build the core position from memory; correct the first error, then restart.
- Days 5-6: say White's plan, Black's plan, and the pawn break without a board.
- Day 7: take the recall test. Record the score; do not count lucky guesses.
- Days 8-10: play three slow practice games, starting from the core position if possible.
- Days 11-13: review only mistakes and deviations that actually occurred in your games.
- Day 14: retake the test and write a one-sentence opening rule in your own words.
