

Torre Attack

A ground-up visual course for practical play

Core route position - gold marks the last move

WHITE FOCUS

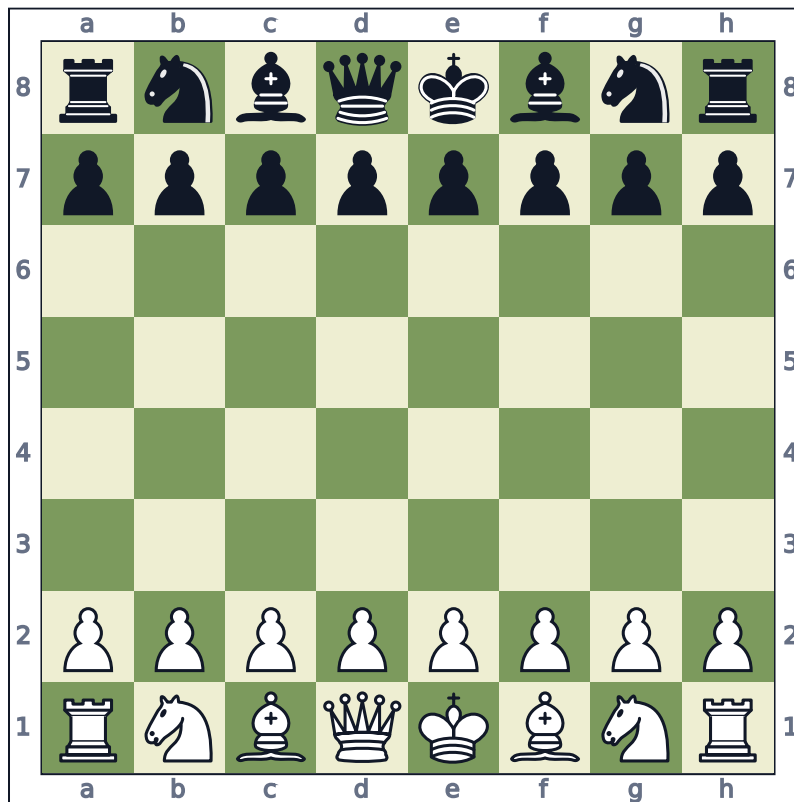

OPENING IDENTITY

White develops simply with Bg5 and keeps several central structures available.

ORIENTATION

Ground zero: read the board and the moves

White starts from ranks 1-2; Black starts from ranks 7-8. Files run a through h. Each lesson highlights the last move in gold so your eyes connect notation to the board.

Starting position - White to move

HOW ALGEBRAIC NOTATION WORKS

Nf3 means a knight moves to f3. B means bishop, R rook, Q queen, K king; pawns use only the destination square. An x means capture, + means check, and O-O means kingside castling.

YOUR FIRST ANCHOR

Say the first moves aloud, then point to every destination square:

1. d4 Nf6 2. Nf3 e6 3. Bg5 d5

Course promise: Simple development, then choose the right center.

MOVES 1-3

Lesson 1: the first conversation

1. d4 Nf6 2. Nf3 e6 3. Bg5 d5

After 3. Bg5 d5

- 1. d4 - Claims or challenges central space and opens a line for a piece.
- 1... Nf6 - Develops a knight toward the center and increases control of key central squares.
- 2. Nf3 - Develops a knight toward the center and increases control of key central squares.
- 2... e6 - Claims or challenges central space and opens a line for a piece.
- 3. Bg5 - Develops on an active diagonal, often adding a pin or long-range pressure.
- 3... d5 - Claims or challenges central space and opens a line for a piece.

1. d4 Nf6 2. Nf3 e6 3. Bg5 d5 4. e3 Be7 5. Bd3 O-O

White develops simply with Bg5 and keeps several central structures available.

Before copying the next move, ask: Is my king safe? Which piece is still at home? What changed in the center? Which pawn break is each side preparing?

CORE LINE

Lesson 3: complete the main route

1. d4 Nf6 2. Nf3 e6 3. Bg5 d5 4. e3 Be7 5. Bd3 O-O 6. O-O b6 7. Nbd2 Bb7

Core position - now plans matter more than memorized moves

DO NOT MEMORIZE BLINDLY

The route is a model, not a forced script. Its job is to teach this relationship: White develops simply with Bg5 and keeps several central structures available. If the opponent deviates, preserve the same priorities until a concrete tactic changes them.

UNDERSTANDING

The position map: plans for both sides

Read plans from the pawn structure, not from the opening name

WHITE'S PLAN

Castle, decide between c4 and a Colle-like e4 setup, and use the pin constructively.

BLACK'S PLAN

Break the pin, challenge d4, and avoid letting White build e4 for free.

THE LEVER TO REMEMBER

White's e4 or c4 changes the character; Black's ...c5 is standard.

CALCULATION

Tactical literacy: what can suddenly change

Pause here - Black to move

THEME

The f6 pin can support e4-e5, but only while the bishop remains safe.

COMMON BEGINNER ERROR

Treating the bishop pin as a permanent threat while neglecting central development.

THREE-SECOND SAFETY SCAN

1. Checks against both kings. 2. Captures in the center. 3. Threats against loose or pinned pieces.

ADAPTATION

Decision tree: when the opponent leaves the route

A branch point - principles are your map

1. If the center stays fluid

Finish development and keep the opening identity in view: White develops simply with Bg5 and keeps several central structures available.

2. If the center closes

Use the pawn-chain direction. Attack the base before making wing moves that cannot be supported.

3. If the center opens

Prioritize king safety, active pieces, and checks or captures before slow pawn moves.

4. If nothing is forced

Return to the planned lever: White's e4 or c4 changes the character; Black's ...c5 is standard.

MEMORY SENTENCE

Simple development, then choose the right center.

ACTIVE RECALL

Recall test: answer before you turn the page

POSITION A

White to move

POSITION B

White to move

- A1. What is the next route move for White?
- A2. What opening problem does that move solve?
- B1. What is the next route move for White?
- B2. Name one plan for White and one plan for Black.
- C. State the thematic pawn break without looking back.

SCORING

5/5: replay from memory. 3-4/5: review Lessons 3 and 6. 0-2/5: return to Lesson 1 and rebuild the route slowly.

RETENTION

Answer key and a 14-day practice loop

POSITION A

Next route move: Bg5. Explain it using development, center, king safety, or a direct tactical need.

POSITION B

Next route move: Bd3. Then compare the position with the final core board.

PLAN AND BREAK ANSWERS

White: Castle, decide between c4 and a Colle-like e4 setup, and use the pin constructively. Black: Break the pin, challenge d4, and avoid letting White build e4 for free. Lever: White's e4 or c4 changes the character; Black's ...c5 is standard.

14-DAY LOOP

- Days 1-2: replay the first three moves from both sides and name each move's job.
- Days 3-4: build the core position from memory; correct the first error, then restart.
- Days 5-6: say White's plan, Black's plan, and the pawn break without a board.
- Day 7: take the recall test. Record the score; do not count lucky guesses.
- Days 8-10: play three slow practice games, starting from the core position if possible.
- Days 11-13: review only mistakes and deviations that actually occurred in your games.
- Day 14: retake the test and write a one-sentence opening rule in your own words.
