
A 12-week course you can repeat

WEEKLY WORKLOAD

Aim for four study sessions of 30-45 minutes and two slow practice games. If that is too much, stretch each week to two weeks. Consistency and review matter more than finishing on a deadline.

A 35-MINUTE SESSION

Spend 5 minutes recalling yesterday's position, 10 minutes learning one decision, 15 minutes calculating or playing a position, and 5 minutes writing the lesson. Keep the answer hidden during recall.

USE A MASTERY GATE

Move on when you can reconstruct the main branch, explain its plan and name the opponent's counterplay on two different days. If not, repeat the decision with a changed opposing reply.

DO NOT STUDY EVERY BRANCH EQUALLY

Prioritize the first line of each family and the lines your opponents play. Optional alternatives are comparison material after the main repertoire is stable.

Weeks 1-3

WEEK 1 / BOARD SKILLS AND THINKING ROUTINE

00 foundations; practice coordinates, legal moves, notation and the blunder check. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 2 / FIRST OPENING FAMILY

01 family 1. Learn its main route, then two alternatives. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 3 / SECOND OPENING FAMILY

01 family 2. Compare the opponent's central choices. Play two practice games and save one critical position. End the week by explaining a decision without the book.

REVIEW LOOP

Revisit new positions after 1 day, 3 days, 7 days and about a month. A failed recall is useful information: shorten the line and rebuild the reason for the move.

Weeks 4-6

WEEK 4 / THIRD OPENING FAMILY

01 family 3. Add common deviations and one warning position. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 5 / FOURTH FAMILY AND BOUNDARIES

01 family 4. Distinguish the main repertoire from optional branches and bridges. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 6 / PAWN STRUCTURES

02 strategic lessons 1-4. Identify the correct break from the actual center. Play two practice games and save one critical position. End the week by explaining a decision without the book.

REVIEW LOOP

Revisit new positions after 1 day, 3 days, 7 days and about a month. A failed recall is useful information: shorten the line and rebuild the reason for the move.

Weeks 7-9

WEEK 7 / DEFENSE AND TACTICS

02 remaining lessons and calculation audits. Practice checks, captures and opponent resources. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 8 / FIRST THREE LABORATORIES

03 laboratories 1-3. Play each starting position from both sides. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 9 / LAST THREE LABORATORIES

03 laboratories 4-6. Compare candidates before revealing the engine lines. Play two practice games and save one critical position. End the week by explaining a decision without the book.

REVIEW LOOP

Revisit new positions after 1 day, 3 days, 7 days and about a month. A failed recall is useful information: shorten the line and rebuild the reason for the move.

Weeks 10-12

WEEK 10 / ENDGAME TRANSITIONS

02 endgames. Analyze one legal exchange sequence from your own game. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 11 / FULL RETRIEVAL TEST

04 questions 1-48. Write explanations before looking at answers. Play two practice games and save one critical position. End the week by explaining a decision without the book.

WEEK 12 / CONSOLIDATE YOUR OWN REPERTOIRE

Repair recurring errors and build a small personal file of the positions you actually meet. Play two practice games and save one critical position. End the week by explaining a decision without the book.

REVIEW LOOP

Revisit new positions after 1 day, 3 days, 7 days and about a month. A failed recall is useful information: shorten the line and rebuild the reason for the move.

Pocket reference / 1

THE FRENCH-TYPE CENTER

Use this card after studying the full explanations. It is a reminder, not a replacement for calculating the current position.

KIA-01 The core French-type position

Support e4 before converting it into an e5 wedge.

KIA-02 The e5 wedge and ...Nd7

An advanced pawn gives space and creates a target.

KIA-03 Black exchanges on e4

A changed pawn structure requires a changed plan.

KIA-04 Black closes with ...d4

Against a d4 wedge, identify a lever.

KIA-05 Black delays castling

Attack a real king position, not a remembered diagram.

KIA-06 The direct 1.e4 French route

A transposition is a position, not a similar-looking setup.

Pocket reference / 2

SLAV STRUCTURES AND ACTIVE BISHOPS

Use this card after studying the full explanations. It is a reminder, not a replacement for calculating the current position.

KIA-07 Slav setup: bishop outside the chain

Notice which bishop escaped the pawn chain.

KIA-08 A direct central challenge with c4

c4 is a useful adaptation, not a failure of the system.

KIA-09 Questioning Bf5 with Nh4

A damaged pawn structure may open useful lines for its owner.

KIA-10 The ...Bg4 pin

A pinned defender may not be a real defender.

KIA-11 An early ...Bg4 without ...c6

The location of the c-pawn changes the available break.

KIA-12 Caro-Kann route with 1.e4

Name the actual central pawns before naming your attack.

Pocket reference / 3

FIANCHETTOS AND OTHER CENTRAL STRUCTURES

Use this card after studying the full explanations. It is a reminder, not a replacement for calculating the current position.

KIA-13 Symmetrical fianchetto

Symmetry calls for useful improvements, not an automatic pawn storm.

KIA-14 Black chooses ...d5 in the fianchetto

When the opponent occupies the center, plan the challenge.

KIA-15 Reversed King's Indian structure

Reversed colors do not reverse every plan mechanically.

KIA-16 The Pachman setup

Count the real pieces around the intended pawn advance.

KIA-17 Sicilian with ...e6

The Sicilian entry is useful when the center matches.

KIA-18 Sicilian with ...d6

KIA piece placement does not guarantee a KIA attack.

Pocket reference / 4

FIRST-MOVE CHOICES AND USEFUL ADAPTATIONS

Use this card after studying the full explanations. It is a reminder, not a replacement for calculating the current position.

KIA-19 Black plays ...c5 on move one

Pick the knight square to support a plan.

KIA-20 Black occupies e5 immediately

A pawn attack on a piece overrides a setup plan.

KIA-21 Dutch-style ...f5

Meet wing space with a supported central challenge.

KIA-22 The ...b5 flank expansion

Ask what the flank bishop attacks.

KIA-23 Early ...d4 before the setup

Adapt the pawn structure before copying the piece setup.

KIA-24 Early central exchange before castling

Queen exchange can change what king safety means.

A practical game-analysis worksheet

GAME DETAILS

Date: _____ Opponent: _____ Time control: _____ Result: _____

FIRST UNFAMILIAR POSITION

Move number: _____ Relevant line ID: _____

What did the opponent's last move threaten? Write the FEN or save the position in your chess program.

MY CANDIDATES

Candidate A and a reply: _____

Candidate B and a reply: _____

Why did I choose the move I played?

DIAGNOSIS

Was the main error opening recall, missed tactics, the wrong pawn break, king safety, an exchange decision or time management? Choose the earliest cause that explains the later problem.

REPAIR

Write one concrete rule tied to the position. Add a short legal variation and schedule the next review. Do not add twenty engine moves that you cannot explain.

Glossary

ANCHOR

The authored move sequence defining a branch; later printed moves may be an illustrative continuation.

COMPENSATION

Activity, king pressure or structural advantages that may offset a material deficit.

COUNTERPLAY

Active threats or pressure that make the opponent address your ideas.

EN PRISE

A piece is available to be captured; check whether the capture is actually safe.

FIANCHETTO

Developing a bishop to b2, g2, b7 or g7 behind a moved b- or g-pawn.

INITIATIVE

The ability to pose threats that influence the opponent's replies.

ISOLATED PAWN

A pawn with no friendly pawn on either adjacent file.

Glossary / continued

MINORITY ATTACK

A pawn advance by fewer pawns against a larger pawn group to create weaknesses.

OUTPOST

A useful supported square for a piece, often difficult for enemy pawns to challenge.

PROPHYLAXIS

A move that anticipates and reduces the opponent's useful plan.

TEMPO

One move of time; useful tempi are gained when threats force helpful replies.

TRANSPOSITION

Different move orders reaching the same position with the same side to move and relevant rights.

ZWISCHENZUG

An intermediate move, often forcing, played before an expected recapture.

Sources and attribution

OPENING NAMES AND ROUTES

Lichess chess-openings is a CC0 reference for established names and entry move orders. The course commentary, study routes and practice curriculum are original. Some Hippo routes use descriptive teaching labels because opening-name databases use that term inconsistently.

<https://github.com/lichess-org/chess-openings>

ENGINE AND LEGAL-MOVE TOOLS

Stockfish 18 supplies finite tactical comparisons and illustrative continuations. python-chess 1.11.2 validates moves, positions and PGN.

Research scope and verification

KING'S INDIAN ATTACK CONTEXT

Public opening references identify the KIA as a flexible White setup. This course distinguishes its pawn structures and includes practical departures rather than treating the formation as a forced sequence. <https://www.chess.com/openings/Kings-Indian-Attack>

WHAT WAS CHECKED

All 130 course anchors across the five courses were legally replayed. Repertoire-side decisions after the opening commitment received 80,000-node best-move and played-move comparisons; apparent losses above 1.00 were rechecked at 600,000 nodes. Flagged choices were revised. Warning lines deliberately contain mistakes and are marked.

ILLUSTRATIONS AND LIMITS

Short anchors were extended to about move ten using 140,000-node searches. Endpoints used 400,000 nodes; laboratory positions used 500,000 nodes per search. These are finite checks, not proofs of equality or exhaustive modern theory. Optional gambits and full Hippo formations retain practical and strategic risks.

WHAT THE NUMBERS MEAN

Laboratory estimates are expressed from your course side's perspective, so higher is better for that side. They are not literal pawn counts or guaranteed winning probabilities. Close candidate values should be treated as comparable, and deeper analysis may change the ordering.

PUBLICATION CHECKS

PDF text, page geometry, board legality and PGN replay are checked. Every combined-volume page is rendered for visual review. The supplied verification manifest records the final page counts and file hashes.
