

Samisch - the Panno main repertoire

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. Nge2 a6 8. Qd2 Rb8

YOUR BLACK REPERTOIRE CHOICE

Use ...Nc6, ...a6 and ...Rb8 against the main Be3/Nge2 setup. The goal is active queenside and central counterplay; it is not the Classical kingside pawn storm.

Main study anchor - White to move

READ THE CENTER

White supports e4 with f3 and often leaves the king flexible. Black's c-pawn remains free, and the c6 knight pressures d4.

WHAT WHITE WANTS

White may play Qd2, castle long and attack with h4, or choose a quieter king placement. White can also close with d5.

THREE HABITS TO BUILD

1. Find where White intends to castle.
2. After d5, move the attacked c6 knight.
3. Prepare ...b5; do not offer it without calculation.

Original repertoire choices and commentary. Public opening names and move-order references, plus local Stockfish checks. Sources and method: Booklet 26.

01 Main Panno: Nge2 and Qd2

STUDY LINE 09-01

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. Nge2 a6 8. Qd2 Rb8 9. h4 h5 10. Nc1 Bd7

Selected anchor ends with 8... Rb8. Later moves show one checked example.

Before 8... - Black to move

End of study line - White to move

WHY THESE MOVES

...a6 and ...Rb8 prepare ...b5. The rook leaves a8 so a future queenside pawn exchange can open a useful b-file.

YOUR NEXT PLAN

Against long castling, examine ...b5 as an attack on the king. Against a slower setup, compare ...e5 and central piece development.

WHITE RESOURCE TO RESPECT

The queenside expansion must survive d5, Bh6 and h4. White's attack can begin before either king commits.

REMEMBER The Panno attacks the center and the queenside.

02 White closes with d5 immediately

STUDY LINE 09-02

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. d5 Ne5 8. f4 Neg4 9. Bd2 e6 10. dxe6 fxe6

Selected anchor ends with 7... Ne5. Later moves show one checked example.

Before 7... - Black to move

End of study line - White to move

WHY THESE MOVES

d5 attacks Nc6. ...Ne5 places it centrally and changes the fight from a flexible d4 center to a closed wedge.

YOUR NEXT PLAN

Prepare ...c6 or ...e6 to question the wedge. White may challenge the knight with f4, so keep an escape route.

WHITE RESOURCE TO RESPECT

Do not continue ...a6 while the knight is attacked. An opening setup never overrides a direct threat.

REMEMBER Answer d5 before completing the formation.

03 White castles long

STUDY LINE 09-03

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. Qd2 a6 8. O-O-O Rb8 9. h4 h5 10. Nd5 b5

Selected anchor ends with 8... Rb8. Later moves show one checked example.

Before 8... - Black to move

End of study line - White to move

WHY THESE MOVES

White announces the king target. Black's rook and a-pawn prepare queenside lines against that king.

YOUR NEXT PLAN

Calculate ...b5 and the resulting pawn captures. White will often use h4-h5 or Bh6, so count forcing moves on both wings.

WHITE RESOURCE TO RESPECT

An opposite-side attack is a calculation race. A one-move defensive resource may be more valuable than another pawn push.

REMEMBER Attack with tempi and defend forcing threats.

04 White restrains ...b5 with a4

STUDY LINE 09-04

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. Nge2 a6 8. Qd2 Rb8 9. a4 e5 10. d5 Nb4

Selected anchor ends with 9... e5. Later moves show one checked example.

Before 9... - Black to move

End of study line - White to move

WHY THESE MOVES

a4 makes a routine ...b5 harder. Black responds in the center, using development to question White's space.

YOUR NEXT PLAN

Study d5 and dxe5 separately. A queenside restraint can leave White a tempo behind in development.

WHITE RESOURCE TO RESPECT

Do not push ...b5 only because it was the original plan. The a-pawn changed the calculation.

REMEMBER When a flank is restrained, test the center.

05 White keeps a flexible rook on c1

STUDY LINE 09-05

1. d4 Nf6 2. c4 g6 3. Nc3 Bg7 4. e4 d6 5. f3 O-O 6. Be3 Nc6 7. Nge2 a6 8. Qd2 Rb8 9. Rc1 Bd7 10. h4 h5

Selected anchor ends with 9... Bd7. Later moves show one checked example.

Before 9... - Black to move

End of study line - White to move

WHY THESE MOVES

Rc1 avoids committing the king and discourages a careless queenside opening. ...Bd7 connects development and supports future central play.

YOUR NEXT PLAN

Choose between ...b5, ...e5 and improving a piece after White declares a plan. Keep the rook on b8 useful.

WHITE RESOURCE TO RESPECT

Rc1 is not queenside castling. The same pawn break may have a different purpose and risk.

REMEMBER Read the king placement, not just Qd2.

Review before your next game

Main-line endpoint - White to move

1. CLASSIFY THE CENTER

White supports e4 with f3 and often leaves the king flexible. Black's c-pawn remains free, and the c6 knight pressures d4.

2. NAME WHITE'S COUNTERPLAY

White may play Qd2, castle long and attack with h4, or choose a quieter king placement. White can also close with d5.

3. CHOOSE A USEFUL JOB

Against long castling, examine ...b5 as an attack on the king. Against a slower setup, compare ...e5 and central piece development.

RECONSTRUCT

Set up the starting position and play this booklet's main line. Before every Black move, state White's threat and why your move is safe. Stop at the first point you cannot explain.

BRANCH TEST

Choose one alternative White move from this booklet. Explain what changed: a defender, a pawn contact, a king choice or a tempo. Then reconstruct the response without looking.

PRACTICE

Play the endpoint against a partner or a chess program, switching colors after one game. Record the first new position and your candidate moves. Use the line ID to find it in Repertoire_Lines.pgn.
